DETAILED ACTION

Election/Restrictions

Applicant's election of Group II, claims 5-7 in Paper No. 8 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1-4 and 8-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 8.

Claims 5-7 are under prosecution therefore.

Drawings

New corrected drawings are required in this application as noted in the attached *Notice of Draftsperson's Patent Drawing Review* (PTO-948). Applicant is advised to employ the services of a competent patent draftsperson outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1637

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Zhu et al.

(Nucleic Acids Research, 1991, Vol. 19, No. 9, page 2511).

Zhu et al. Disclose a method of using the combination of exonuclease III and polymerase in a PCR (Polymerase Chain Reaction) (Abstract).

The exonuclease employed by Zhu et al. is added in an effort to reduce contamination during PCR (therefore, arguably enhances PCR fidelity) (1st column). Protocol 1 discloses that Taq polymerase (claim limitation 7) and Exo III (1st enzyme with essentially no polymerase activity) are present in a PCR mixture (therefore, a composition).

Therefore, Zhu et al. anticipate the invention as claimed.

Conclusion

No claims are allowed.
